Il corso è strutturato in 4 differenti moduli che possono essere affrontati singolarmente o, come consigliato, essere seguiti insieme. I quattro moduli approfondiranno i 4 momenti fondamentali del trattamento protesico, fondamentali sia nel caso semplice che in quello complesso: la fase diagnostica, la fase di preparazione dentale e provisionalizzazione, la fase di gestione dei tessuti molli e la fase di finalizzazione del caso. In ogni modulo, più professionisti si affiancheranno al relatore per approfondire aspetti extra-protesici che hanno importanza significativa.
