

Pubblicazioni di Antonella Russo - 2010/aprile 2021

1. Palumbo E., Matricardi L., Bensimon A., **Russo A.** (2010) Replication dynamics at common fragile site *FRA6E*. *Chromosoma* 119:575-587.
2. Adler I.-D., Pacchierotti F., **Russo A.** (2012). The measurement of induced genetic change in mammalian germ cells. In: Parry J; Parry E. *Genetic Toxicology: Principles and Methods*. Series: *Methods in Molecular Biology*, vol. 817, p. 335-375, Humana Press. doi: 10.1007/978-1-61779-421-6
3. Palumbo E., Tosoni E., Matricardi L., **Russo A.** (2013). Genetic Instability of the Tumour Suppressor Gene *FHIT* in Normal Human Cells. *Genes Chrom Cancer*, 5:832-844, doi: 10.1002/gcc.22079
4. Palumbo E., Tosoni E., **Russo A.** (2013). General and specific replication profiles are detected in normal human cells by genome-wide and single-locus molecular combing. *Exp Cell Res*, 319: 3081-3093, doi: 10.1016/j.yexcr.2013.10.001
5. **Russo A.**, Pacchierotti F., Cimini D., Ganem N.J., Genescà A., Natarajan A.T., Pavanello S., Valle G., Degraffi F. (2015) Genomic instability: crossing pathways at the origin of structural and numerical chromosome changes, *Environ Mol Mutagen*, 56:563-580.
6. Marchetti F., Massarotti A., Yauk C.L., Pacchierotti F., **Russo A.** (2016) The adverse outcome pathway (AOP) for chemical binding to tubulin in oocytes leading to aneuploid offspring, *Environ Mol Mutagen*, 57:87-113.
7. Barbaro V, Nasti AA, Raffa P, Migliorati A, Nespeca P, Ferrari S, Palumbo E, Bertolin M, Breda C, Miceli F, **Russo A**, Caenazzo L, Ponzin D, Palù G, Parolin C, Di Iorio E (2016) Personalized Stem Cell Therapy to Correct Corneal Defects Due to a Unique Homozygous-Heterozygous Mosaicism of Ectrodactyly-Ectodermal Dysplasia-Clefting Syndrome, *STEM CELLS Translational Medicine*, 5:1098-105.
8. Stevanoni M, Palumbo E, **Russo A** (2016) The replication of Frataxin Gene is assured by activation of dormant origins in the presence of a GAA-repeat expansion. *PLoS Genet*. 12(7):e1006201.
9. Palumbo E, **Russo A.** (2017) Chromosome imbalances in cancer: molecular cytogenetics meets genomics. *Cytogenet Genome Res*, 150:176-184.
10. Pajalunga D, Franzolin E, Stevanoni M, Zribi S, Passaro N, Gurtner A, Donsante S, Loffredo D, Losanno L, Bianchi V, **Russo A**, Rampazzo C, Crescenzi M (2017) A defective dNTP pool hinders DNA replication in cell cycle-reactivated terminally differentiated muscle cells. *Cell Death Differ*, 24:774-784.
11. Cucco F, Palumbo E, Camerini S, D'Alessio B, Quarantotti V, Casella ML, Rizzo IM, Cukrov D, Delia D, **Russo A**, Crescenzi M, Musio A. (2018) Separase prevents genomic instability by controlling replication fork speed. *Nucleic Acids Res.*, 46:267-278.
12. **Russo A**, Degraffi F (2018) Molecular cytogenetics of the micronucleus: Still surprising. *Mutation Res, Genet Toxicol Environ Mutagen*, 836:36-40.
13. **Russo A**, Cordelli E, Salvitti T, Palumbo E, Pacchierotti F (2018) Rad54/Rad54B deficiency is associated to increased chromosome breakage in mouse spermatocytes. *Mutagenesis*.33:323-332
14. **Russo A**, Palumbo E (2019) Common fragile site instability in normal cells: Lessons and perspectives. *Genes Chromosomes and Cancer* 58: 260-269
15. Kirsch-Volders M, Pacchierotti F, Parry, EM, **Russo, A**, Eichenlaub-Ritter, U, Adler, I.-D (2019) Risks of aneuploidy induction from chemical exposure: Twenty years of collaborative research in Europe from basic science to regulatory implications. *Mutation Research - Reviews in Mutation Research*, 779, pp. 126-147
16. Palumbo E, Piotto C, Calura E, Fasanaro E, Groff E, Busato F, El Khouzai B, Rigo M, Baggio, L, Romualdi C, Zafiroopoulos D, **Russo A (co-corresponding author)**, Mognato M,

- Corti L (2019) Individual Radiosensitivity in Oncological Patients: Linking Adverse Normal Tissue Reactions and Genetic Features. *Frontiers in Oncology*, 9: 987
17. Franzolin E, Coletta S, Ferraro P, Pontarin G, D'Aronco G, Stevanoni M, Palumbo E, Cagnin S, Bertoldi L, Feltrin E, Valle G, **Russo A**, Bianchi V, Rampazzo C (2020) SAMHD1-deficient fibroblasts from Aicardi-Goutières Syndrome patients can escape senescence and accumulate mutations. *FASEB journal*, 34: 631-647.
 18. Doni D, Rigoni G, Palumbo E, Baschiera E, Peruzzo R, De Rosa E, Caicci F, Passerini L, Bettio D, **Russo A**, Szabò I, Soriano ME, Salviati L, Costantini P (2021) The displacement of frataxin from the mitochondrial cristae correlates with abnormal respiratory supercomplexes formation and bioenergetic defects in cells of Friedreich ataxia patients, *FASEB journal*, 35:e21362.
